Polytechnic Institute of Castelo Branco

Contact Us

To add eBooks by authors from your organization to your library contact your local licensing manager [here](#)

Researchers from your organization have been actively contributing to Springer Nature's books. We've compiled a snapshot of data that provides an overview of the total research output from your organization in Springer Nature books (including Palgrave) in the last 5 years (full year data 2019 - 2023), highlighting the main subject areas of focus.

If your existing eBook holdings do not include this content, Springer Nature's flexible eBook licensing options are worth considering. Incorporating these resources into your library could broaden the range of available resources, thereby providing robust support for your researchers and enriching your community's knowledge base.

Springer Nature publications by researchers at your organization

Book Chapter Authors		
118	Authors	No. of authorships in chapters
109	Chapters	No. of unique chapters published with SN
55	Books	No. of books chapters have been published in

*publication data for period 2019 - 2023 sourced from Dimensions
